# CLOTHESLINE HANGING SYSTEM

tutorial

SUPPLIES:
- clothespins
- coarse string/jute twine
- drill
- 2 finishing nails
- hammer

Take two clothespins (end-pins) and drill holes in the top of each end using a bit just slightly larger than your nailhead. Test your nail with the holes afterwards if you need to make the hole larger.

Measure your string about 6 inches longer than the width of your desired clothesline & tie giant knots at each end. Trim off extra string & sandwich knots inside each of the end-pins.

Hammer your two nails into the wall at the appropriate distance, making sure your nails are level with each other.

Slide the two end pins onto the nails & adjust the string tension. You want it to be tight and your endpins parallel to the ground. Hang your artwork on the string using the remaining clothespins & enjoy.
