

# YELLOW PAGES BOOSTER SEAT

## tutorial

melissaesplin.com

### SUPPLIES:

- pencil
- pins
- thread
- fabric (1/4 yd)
- ribbon (1 yd)
- measuring tape
- sewing machine
- washable marker
- yellow pages

Measure your yellow pages. Mine were 20 inches x 24 3/4 inches. Make sure to measure accurately, but not too tight, otherwise you might be cursing me later.

Cut your fabric. From the measurements I took I used a simple formula to calculate my measurements:

$$X \div 2 + 1 = \text{WIDTH} \quad Y \div 2 + 1 = \text{HEIGHT}$$

Cut two squares using the above formula & cut a third at HEIGHT x 4 inches.

Snag one of your large rectangular pieces & the small one & fold the long edge over twice (for a clean edge on both sides) iron and hem. Set aside.

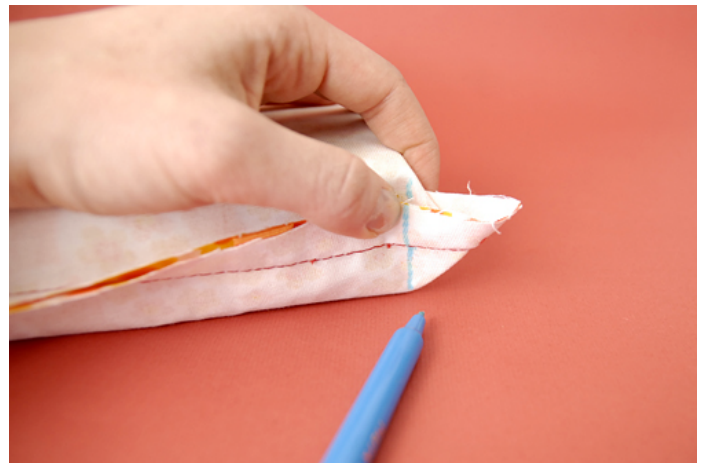

Cut ribbon in half & fold each half in half. Grab the remaining large rectangle (the one without the hem) & pin the ribbon 3 inches from each corner along the long side of the fabric with the ribbon fold flush to the edge of the rectangle. Pin ribbon in place.

Place large, hemmed rectangle right-side down on top of your ribbon. Match the long unhemmed side to the side where ribbons are secured. You want to have the ribbons opposite of the envelope opening.

Place the smaller rectangle right-side down on top of the two fabric pieces. Line up the unhemmed side to the bottom of the first rectangle. Pin all pieces in place. Sew along all four sides with a 1/2 inch seam allowance.

While the casing is still inside out, slip your yellow pages into the cover & pinch off corners (the two corners that are opposite of the envelope opening). Pinch the excess fabric & mark a line where the edge of the yellow pages are.

Remove yellow pages from casing & sew along those two perpendicular lines. This will create two boxed corners.

Flip casing right side out & insert yellow pages binding side first. When enclosing the envelope, bend the pages of your book in order to get the envelope over the book. Push pages back into place.

Tie the book to a chair & use as a booster seat! Enjoy!
